

November 9, 1959

Dear Sir:

Subject: Contract EQ-1806, Z-1170
Final Invention Report

The first installment of this report, indicating there were no inventions up to that date, was made under date of January 22, 1957.

The following subcontracts, containing Patents Rights Clauses, were placed by Kodak:

| | |
|------------------------|-------------------------------|
| Magnavox Company | PO #43494 #23706 #43497 |
| Computer Control Corp. | #43495 |

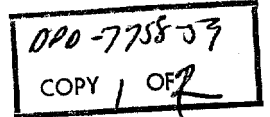

Also, a subcontract, No. 53298-A, was placed with Kodak A.G., Stuttgart, Germany, which did not contain Patents Rights Clauses. Purchase orders were also placed with Vectron, Inc., Waltham, Massachusetts, Nos. G-93358 and G-13758, for design and engineering of a 70mm step-and-repeat printer and a 70mm and 9 $\frac{1}{2}$ " continuous turn-around printer.

We have reviewed with our project engineers the work done by Kodak and by each of the subcontractors under the above-identified subcontracts and purchase orders. We find that there were no subject inventions made under this contract.

This constitutes the final invention report under, and full compliance with, the Patents Rights Clause of this contract.

J. L. B.
